WISE - INFO 5960.091/.095: THE HYPERLINKED LIBRARY: EMERGING TRENDS, EMERGING TECHNOLOGIES (3.0 CREDIT HOURS)

What emerging trends are changing library services? What does a connected world of "continuous computing" mean for 21st century libraries? This course provides a roadmap toward becoming the hyperlinked library: transparent, participatory, playful, user-centered and human, while still grounded in our foundations and values. Library scholars have noted the ongoing impact of technology on libraries and have called for a redesign of services to meet the evolving needs of users. Virtual communities have thrived online since the early 1980s. New media and social sites are part of the next incarnation of the world wide web, where digital tools allow users to create, change, and publish dynamic content of all kinds. The evolving web and related emerging technologies are signifiers of a broader cultural shift: toward an open, collaborative and participatory society. This course examines emerging technologies within a framework of participatory, hyperlinked library service: a model of creating, extending, updating and evaluating libraries via a user-centered approach. The hyperlinked library is an open, participatory institution that welcomes user input and creativity. It is built on human connections and conversations. The organizational chart is flatter and team-based. The collections grow and thrive via user and staff involvement. Librarians are tapped into user spaces and places online to interact, have presence and point the way. In Library 2.0: A Guide for Participatory Service, Casey and Savastinuk describe the participatory service model: "It is a model for library service that encourages constant and purposeful change, inviting user participation in the creation of both the physical and the virtual services they want, supported by consistently evaluating services. It also attempts to reach new users and better serve current ones through improved customer-driven offerings." This course will examine various emerging theories of library service, the use of social networking and other technological tools, the creation of online collaboration and communities via those tools, and their adoption by libraries. We will discuss the definition of participatory service, explore some key trends that impact the model, and examine what this shift means for libraries and information work in the 21st century. Students will experience an immersive learning environment via a wide range of tools.
