  - Course Topic: QUANT METHODS & DATA VIS
  - Full Topic: QUANTITATIVE METHODS AND DATA VISUALIZATION.
  - The purpose of this course is to increase data literacy and to introduce students to advanced methods of managing, analyzing, and graphically representing data. The course begins by exploring ways to describe data with means, medians, standard deviation, skewness, etc. Then, intermediate concepts like properties of individual variables, statistical significance, and bivariate analysis are covered. Advanced topics include multivariate analysis (regression) and using R-studio for visualizing statistical output in graphs and tables. It is advised that students have taken either Math 1680 (Elementary Probability and Statistics) at UNT, or AP Statistics in high school. Waivers for these requirements may be granted at the discretion of the instructor.
